Subject: letter for Klaus Goeke

Dear Klaus!

I'm writing this letter (much too short, than the situation deserves) with great pleasure, using today's meeting in TP2 as an opportunity to express my deep sincere gratitude for your warm hospitality and permanent support during my stay in Bochum for more than 2 years, when you were one of my co-hosts as a Humboldt fellow. It was really one of the happiest periods of my life - to a large extent, owing to the nice, friendly atmosphere in the Institute, created and encouraged under your supervision since many years. I must say that I benefited a lot from my time in Bochum and, in particular, from contacts, discussions and relations with the local people: all of these carries for me an imprint of your personality. Now I would like to wish you fast and complete recovery, good health - this is the first of all! - and further fruitful successful work in Physics.

With best wishes,  
Igor Cherednikov
