Dear Klaus,

I send you my warmest congratulations and Good Luck to you and your family on the occasion of your retirement, my best wishes to you for a recovery from your recent surgery, and wishing you also an enjoyable and fruitful 16 March physics hadron physics lecture session. Unfortunately, I am not able to be with you for this session due to the short notice. But I join you and your family and friends in spirit. It has been a pleasure for me in the past to successfully collaborate with you on many different physics projects especially on defending  $\theta$  priorities. As I approach now my own retirement, I look forward to continuing such collaborations with you during my planned future visits to Bochum, especially considering that I feel so much at home there. So I hope you will be able to make time for me, even if you plan to focus more in the future with family and other interests. As a retiree, you can also try to get new physics ideas while hiking outdoors, or at a concert.

With warm regards, Leonya
