Subject: Letter to Klaus

Lieber Klaus,

Ich sende meine hertzliche Gruesse and Wuensche anlaesslich Seinen
65 Geburtstag.

Looking around, all the time I see people
who were taught by you, who worked with you,
who were inspired by you,
who were helped by you in infinitely various ways.

You created a very special and unique scientific school,
you did your best to make the RUB Theoretische Physic II
a place where it is extreme fun just to be there,
great pleasure to work, exciting to meet the people
attracted by you to the Institute.

Everybody knows that you love to help people,
and that is way we all are extremely fond of you!

I wish you, first of all, Gesundheit, good mood,
a productive and happy retirement!

Yours,

Tolya
