Lieber Klaus,

I would like to tell you that in this special your day which emphasizes your work as a Physicist - and which I appreciate very much - I stay with you in a spiritual touch. I keep in my memory all our meetings during many years, both in Bochum or somewhere else and our talks and discussions. I am always impressed by your youthful activity and warm relations to the others. I wish you today still many new important achievements as a Scientist as well as all the best in other domains.

Viele Gruesse

Lech
